

## SPRING 2020 PROGRAMME

Tuesday	Wednesday	Thursday	Saturday	Sunday
				10:30-11:30 am À la découverte des techs – Niveau III FR 10-12 y.o.
				2-3pm Discover Tech EN 10 y.o. +
	3-4pm JS animations FR 12 y.o. +		3-4pm À la découverte des techs – SPÉCIAL FRANCO FR 10 y.o. +	3:30-5pm JS avancé FR 13 y.o. +
5-6pm À la découverte des techs - Niveau I FR 8-10 y.o.		5-6pm À la découverte des techs - Niveau II FR 9-11 y.o.		

FR : French EN : English

## Our Spring 2020 session is entirely online!

Given the exceptional circumstances, we thought it was best to offer a short online Spring session at a reduced price.

The robotics and electronics workshops are unfortunately postponed until September 2020 !

### Schedule

The Spring Session includes 6 workshops. The first workshop starts on **Sunday May 3, 2020**. There is no workshop on Sunday May 24 (Ascension weekend).

### Price

We know that for many, the crisis has had a financial impact. This is why we decided to **reduce our hourly rate**. For this Spring session, it is exceptionally €10/hour whereas it was just over €13/hour.

We hope that this gesture of solidarity will allow as many families as possible to register their children. If the price remains too high, contact us!

Payment can now be made by Bancontact or by credit card.

### Videoconferences

In April, we gave all our workshops by videoconference. Of course, this new format is not as friendly as our traditional face-to-face workshops, but it has proven to be a good alternative. It requires a bit of adjustment from everyone : participants need to be a bit more autonomous and we help them by creating a detailed activity sheet for each workshop.

We use the Zoom platform for our videoconferences. The platform is free for participants. It allows us to use sound and image to give our workshops, while it allows participants to share their screen with us to show us their progress and to get help when they need it.

We are aware that there are concerns regarding Zoom's security. This is why we change the meeting ID and password of each workshop. In addition, participants must wait in a virtual waiting room before they can join the videoconference. This allows us to filter the attendees.

Finally, as with any other online service, we strongly recommend that you use a new password for your Zoom account !

## Equipment needed

Participants need a computer, a microphone and a good Internet connection. For an ideal setup, they can add a camera and a second screen.

*Pour inscrire votre enfant à un atelier en français, veuillez consulter le programme français sur notre site web.*

Subscribe to our newsletter ([www.techieslab.org](http://www.techieslab.org)) to be notified of all our events!

We may cancel a workshop if we get fewer than 6 registrations.

## Workshop Description

### Discover Tech

**Schedule :** Sundays, from 2pm to 3pm

**Age :** 10 y.o. +

**Price :** 60 €

**Prerequisites :** A good knowledge of Scratch is recommended

During the first three workshops of the Session, we will create a more realistic game in Scratch, which will lead us to learn/review variables, lists and functions. We are getting closer to "real" (textual) programming languages!

During the last three workshops, we will introduce the web's most famous languages: HTML and CSS. Our goal : build our first mini website !
